

## **Policy on Multiple Deficiencies**

Students who accumulate more than one required deficiency [clinical component, NBME subject exam (i.e. end of clerkship exam component, and or NBME/USMLE exam(s)] will be withdrawn from further clinical activity at the end of the current clerkship or clinical activity in which they are scheduled until all deficiencies are resolved. **Students may not resume clinical activity until they have passed all deficient exams and clinical components. Students are allowed to participate in non-clinical activities**

*Approved Chicago Student Advancement Committee June 16, 1998  
Modified Chicago Curriculum Committee, 26 July 2000.*
