Comprehensive Airway Curriculum

- Access to an extensive literature database.
- A lecture series with local and external experts.
- Simulation-based education with one on one teaching and high-fidelity scenarios.
- Operating room airway management experience.
- ICU airway management experience.

Highlights/benefits of the curriculum

- ❖ Hands-on experience with the equipment and simulation scenarios that are highly realistic.
- ❖ One on one with faculty who help each fellow identify their own strengths and weaknesses.
- ❖ Opportunities to develop scholarly activities.
- ❖ Senior fellows become instructors teaching the junior fellows.
- ❖ Fellows perform 40-70 intubations during their fellowship.
- ❖ Assessment of an Airway Curriculum in a Pulmonary and Critical Care Fellowship Program | ATS Scholar | Articles in Press (atsjournals.org)

One on One teaching with instructors

Cricothyroidotom y training

Training on fiberoptic intubation and bronchial blocker placement

High-fidelity simulation scenarios

Dedicated airway curriculum faculty
