

MICROSURGERY TRAINING COURSES

Maria Siemionow, MD, PhD, DSc

Hand Surgery and Peripheral Nerve Surgery
Director of Microsurgery Research
Department of Orthopaedics
The University of Illinois at Chicago
Chicago, Illinois

Training in Microsurgery is directed to surgeons in the following specialties: general surgery, neurosurgery, urology, gynecology, otolaryngology, as well as plastic, orthopaedic and hand surgery. The courses are also directed to trainees in those specialties and researchers who seek training in practical microsurgery at either of two levels, **basic** or **advanced**. Microsurgery courses are held on a weekly basis through-out the year. The five day course runs from 9:00am to 5:00pm Monday through Friday at the discretion of the Department of Orthopaedics. All application forms will be followed up by a phone call and confirmed by mail. The microsurgery laboratory accommodates a maximum of three trainees at a time. The courses use videotapes and direct one-on-one teaching. All surgical procedures are performed on experimental rats. All instruments, suture material, and microscopes used are of the highest standards available. Each trainee will have access to both a Zeiss and Leica operating microscopes and one-on-one instruction.

Basic Microsurgery Course

The **Basic Course** will introduce the use of an operating microscope, microinstruments and microsuture.

Course objectives:

As a result of attending this course, participants will **acquire skills for microsurgical dissection under an operating microscope**, will be trained in vessel dissection, various microsurgical techniques, **arterial and venous anastomoses**, including end-to-end and end-to-side anastomoses, in addition to the preparation and placement of **vascular grafts**.

Techniques: Basic

- Basic suturing using suturing pads
- Vessel dissection
- Vessel preparation for the anastomoses
- End-to-end arterial anastomoses
- End-to-side arterial anastomoses
- End-to-end venous anastomoses
- End-to-side venous anastomoses
- Interpositional vein grafts
- Arterial grafts

Advanced Microsurgery Course

The **Advanced Course** is offered to individuals who have completed the basic microsurgery course.

Course objectives: As a result of attendance, the participants will be able to raise, release and revascularize cutaneous, muscular and composite free tissue transfers and practice limb replantation. In addition teaching of advanced microvascular techniques (e.g. bypass or a-v shunts) will be available.

Techniques: Advanced

- End-in-end (sleeve) anastomosis
- Arterial bypass
- Venous bypass
- A-V shunts
- Free groin flap
- Hind limb replantation
- Lymph node flap

Specialty-Oriented Microsurgery Course

The **Specialty-Oriented Course** can be tailored for individual participants with interest of applying microsurgical techniques to nerves, fallopian tubes, and vas deferens. After 3 days of acquiring microsurgical skills by performing end-to-end anastomoses, trainees will then be able to practice their requested model of interest.

Course Objectives:

As a result of attending this course, participants will be able to become familiar with microsurgical techniques related to the fields of their particular interest such as: urology, neurosurgery, gynecology, and otolaryngology.

Specialties and Techniques:

- Urology: Vasovasostomy
 Vasoepididymostomy
- Neurosurgery: Epineural end-to-end nerve repair
 Fascicular end-to-end suturing
 End-to-side nerve repair
 Conventional nerve grafting
 Vascularized nerve grafting
 Arterial and venous anastomosis in the
 brain region on request
- OB/GYN: Fallopian tube anastomosis
- ENT: Dissection and anastomosis of nerves and
 vessels in the laryngeal region on request

Advanced Course in Experimental Models

The **Advanced Course** offer a novel approach to introduce sophisticated experimental models as a part of microsurgical and research training. The participants of this course will have individual tutorials and presentations on requested experimental models. The validity of models for experimental design as well as pitfalls and success prerequisites will be discussed with participants on daily basis.

Available Experimental Models:

- Rat hind-limb replantation rat
- Hind-limb transplantation
- Face transplantation
- Laryngeal transplantation
- Free tissue transfer
- Rat cremaster muscle flap preparation

General Information

For further information about the Microsurgery Courses, call the following numbers:

Phone: (312) 996-2578

Fax: (312) 413-8775

Cancellation Policy

If you are unable to attend or need to cancel the course, please notify our office immediately at (312) 996-2578. A full refund will be issued if you inform UIC within two weeks prior to the course date. If you cancel after this time, a \$400.00 cancellation fee will be deducted from your refund to cover non-refundable materials. Written notification of your cancellation is required in order to process your refund.

Accreditation Statement

The University of Illinois at Chicago Office for Continuing Education is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

The University of Illinois at Chicago Office for Continuing Education designates this live activity for a maximum of 40 *AMA PRA Category 1 Credits*[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Participants claiming CME credit from this activity may submit the credit hours to the American Osteopathic Association for Category 2 credit.

Americans with Disabilities Act

The University of Illinois at Chicago Office for Continuing Education fully intends to comply with the legal requirements of the Americans with Disabilities Act. If you need assistance, please contact our office (312) 996-2578 at least one month prior to the activity.

Location

The Microsurgery Laboratory is located at:

900 South Ashland Avenue, Room 3356
Molecular Biology Research Building (MBRB)
Chicago, Illinois 60607

Parking

Parking is available in the Paulina Street Parking Lot for \$13 per day. The parking lot is located across the street from the MBRB on Marshfield Avenue.

Accommodations

Chicago Marriott at Medical District/UIC
625 S. Ashland Avenue at Harrison
Chicago, IL 60607 Phone: (312) 491-1234

UIC Guest Housing
1933 West Polk Street
Chicago, IL 60612 Phone: (312) 355-6317
