

Center for MR Research – 3T

Policy 2: Confidentiality of Research Data

The Center for MR Research provides a service for many individual investigators. Since some of these investigators may be involved in similar research, the confidentiality of the individual investigators research data must be secured such that it cannot be used by anyone but the investigator or his/her designates.

PROCEDURE

- A. The Center for MR Research staff will be responsible for moving data from the scanner to the designated data destination provided by the PI on the "Data Transfer Form" at the completion of each scan performed by the Center for MR Research staff in a timely fashion.
- B. The PI and/or their research staff will assume all responsibility for any CDs created for the purpose of providing their subjects with their image data.
- C. If the Investigator or his/her designate performs the scan involved in their research, the Investigator or his/her designate is responsible for removing the information from the scanner workstation as soon as the scan is complete. The Center for MR Research will not be responsible for the confidentiality of the information left on the scanner after completion of the study.
