

## Center for MR Research – 3T

# Policy 11: Pregnancy

It is the policy of the Center for MR Research to provide institutional and national professional organization safety guidelines for pregnant staff and / or research staff. In addition, we request that any pregnant personnel follow the below procedures.

### PROCEDURE

- A. If you are pregnant, or suspect you may be, you must notify the MR research technologist operating the scanner on the day of your experiment.
- B. Once pregnancy is suspected, individuals may not remain in the magnet room during actual scanning. PI's, RA's and/or MR Staff may monitor the subject from the control room **ONLY**.
- C. PI's, RA's and/or MR Staff may enter the MR environment to setup any research equipment, speak with their subjects, etc. **ONLY** during times when actual scanning is **NOT** taking place.
