

## Center for MR Research – 3T

# Policy 7: Cardiopulmonary Resuscitation

The Center for MR Research recognizes that the patient, staff, or visitor who experiences the sudden, unexpected cessation of cardiopulmonary functions, is best managed by an interdisciplinary team trained and equipped to implement cardiopulmonary resuscitation (CPR). All Center for MR Research staff will be certified in Basic Life Support (BLS – Adult/Pediatric); Advanced Cardiac Life Support (ACLS); Pediatric Advanced Life Support (PALS) and will maintain current certification throughout their employment with the Center. Documentation of current certification must be maintained in each staff member’s human resource file.

### PROCEDURE

- A. If someone within the care or vicinity of the 3T MR Research Service experiences an unexpected cessation of cardiopulmonary functions:
  1. Dial 9-911
  2. State location, “980 Building, 2242 Harrison (AIC).”
  3. Specify adult or pediatric depending on age of person.
  4. Provide your name, telephone number, and patient name, if known, and specify that we are an MRI facility.
- B. Any Center for MR Research staff who initiates CPR must be trained as a basic life support provider.
